Who produces electricity in Bolivia?

The electricity sector in Bolivia is dominated by the state-owned ENDE Corporation (Empresa Nacional de Electricidad), although the private Bolivian Power Company (Compañia Boliviana de Energía Eléctrica; COBEE) is also a major producer of electricity.

Does Bolivia have a monopoly?

As for distribution, the six existing companies enjoy a geographic monopoly in their concession areas. The largest company is Electropaz, which is majority-owned by Spain's Iberdrola. In May 2010 president Evo Morales nationalized 80% of Bolivian generation by capacity, in his Government's attempt to regain

ownership of public service companies.

Why is Bolivia a difficult country for extending electricity to remote regions?

Bolivia's rugged terrain and geographical diversity present unique difficulties in extending electricity infrastructure to remote regions. The mountainous terrain and vast distances make maintenance and repairs more challenging, leading to occasional disruptions in power supply.

Does Bolivia have a good electricity system?

According to the World Bank, the electrification rate in Bolivia increased from approximately 73% in 2000 to around 97% in 2019. This significant progress highlights the government's commitment to ensuring widespread access to electricity for its population. The reliability of the electricity supply network in Bolivia has also seen improvements.

How has Bolivia improved its electricity supply network?

In recent years, Bolivia, a landlocked country in South America, has made significant strides in improving its electricity supply network. The country has implemented various initiatives to enhance access to electricity and increase the network's reliability, benefiting both urban and rural areas.

How much electricity does Bolivia import?

Bolivia's electricity export and import activities are fairly limited. Imports from Brazil amount to less than 0.01 TWh per year and have so far been devoted to supply the city of Puerto Suarez, in the Department of Santa Cruz. Electric power consumption per capita in 2006 was 588 kWh (a 19% increase since 1996).
