

# **China-Africa New Energy Storage Industry**

## Overview

---

Does China have a role in Africa's energy sector?

China's involvement in Africa's energy sector and its critics can be roughly divided into two stages.

Can China close Africa's energy gap?

China's solar industry is keen to close Africa's energy gap, providing sustainable energy to the millions that don't have access. For instance, at this year's Forum on China-Africa Cooperation gathering, China is expected to advance its Africa Solar Belt Programme.

Does China invest in non-hydro renewables in Africa?

Another recent criticism is that China does not have significant investment in non-hydro renewables in Africa compared to other energy sectors, despite it being a global leader of wind and solar energy investment domestically and Africa's huge untapped potential in renewable resources.

How big is China's energy storage capacity?

[Sign up here](#). Current installed new energy storage capacity, which is made up mostly of lithium-ion battery storage, was 95 GW as of June, the regulator, the National Energy Administration, said in August. China has raced ahead of its energy storage targets in the past.

How many Chinese energy infrastructure projects are there in Africa?

Current version of database includes 100 Chinese energy infrastructure projects (48 ODA projects, 32 non-ODA projects, and 20 unidentified projects) in Africa, with the total commitment more than 25.5 billion USD (as some projects' value remain unidentified).

Is China's energy sector a domestic or overseas business?

There is a clear distinction between domestic and overseas business in terms of actors and institutions in China's energy sector. The top ten recipient countries include South Africa, Ethiopia, Angola, Sudan, Nigeria, Zimbabwe, Kenya, Cameroon, Ghana and Cote D'Ivoire.
