

Commercial solar power generation systems in Tuvalu

Overview

The Sopoaga Ministry led by Enele Sopoaga made a commitment under the Majuro Declaration, which was signed on 5 September 2013, to implement power generation of 100% renewable energy (between 2013 and 2020). This commitment is proposed to be implemented using Solar PV (95% of demand) and.

Renewable energy in Tuvalu is a growing sector of the country's energy supply. has committed to sourcing 100% of its from .

Tuvalu's power has come from electricity generation facilities that use imported diesel brought in by ships. The Tuvalu Electricity Corporation (TEC) on the main island of .

In 2014 the Tuvalu Electricity Corporation (TEC) began implementing a Master Plan for Renewable Energy and Energy Efficiency (MPREEE) through the Tuvalu Energy Sector Development Project (ESDP), which builds on the Tuvalu National Energy.

On 27 November 2015 the Government of Tuvalu announced its (NDCs) in relation to the reduction of greenhouse gases (GHGs) under provisions of the United Nations Framework Convention on Climate Change.

In 2007, Tuvalu was getting 2% of its energy from solar, through 400 small systems managed by the Tuvalu Solar Electric Co-operative Society. These were installed beginning in 1984 and, in the late 1990s, 34% of families in the outer islands had a PV system.

is also mentioned as a future electricity source. Tuvalu's commitment, as part of the , is to implement power generation of 100% renewable energy (between 2013 and 2020). The feasibility of wind power generation will be.

• , (2012) video by , the project developer • Tuvalu: Renewable Energy in the Pacific Islands Series documentary film (2012) Global Environment Facility (GEF), United Nations.

Despite a heavy reliance on imported fossil fuels, which constituted 96% of its energy supply in 2021, Tuvalu has made strides in solar energy

implementation, including the establishment of the first grid-connected solar power system in the Pacific Islands, supported by the e8 Alliance.
