

# **Delivering solar panels**

## Overview

---

There are two main methods for delivering solar panels: LTL and FTL. Each has its own benefits and considerations.

Solar panel transportation, or solar freight, involves moving solar panels from manufacturers to distributors, contractors, and finally to installation sites. Unlike regular deliveries, solar panel transportation needs extra care. These panels are fragile.

Proper preparation is key for freight shipping solar panels safely. Here's a checklist to ensure everything goes smoothly: 1. Inspect Packaging: Make sure panels are securely.

Solar panels are just one part of the entire solar energy system. Various other components are essential for a functioning setup, and each requires careful transportation.
