

Does the base station have a backup power supply

Overview

No, the Arlo Base Station does not have a built-in battery backup. It requires a direct power source to operate properly. The absence of battery backup means that if there is a power outage, the base station will not function. What is a battery backup power station?

A battery backup power station is the perfect disaster prep solution, ensuring that you always have access to electricity and the ability to keep your devices charged. Goal Zero offers a wide variety of options to meet your needs.

How does the base station work?

It also features a cellular module that operates on a cellular network instead of Wi-Fi. The Base Station will automatically communicate on the cellular network if your Wi-Fi stops working and will automatically switch to battery power if you lose electricity.

What is a base battery system?

The Base battery system is built for performance and reliability. It combines a high-capacity lithium iron battery with intelligent software to optimize energy use. The Base battery system has three main components: the battery pack, inverter, and hub. The long white unit is the battery pack. We mount the battery pack on the ground.

What does a base hub do during a power outage?

During a power outage, the Base hub disconnects your home from the grid. This ensures that the stored energy in your battery powers only your household. Learn more about the components of your battery system below, in the section "What's inside your Base battery system." The average power outage in Texas lasts 2.5 hours.

Can I change the batteries in my base station?

Though we recommend contacting support if you need to change the batteries

in your Base Station, if your power outage lasts longer than 24 hours, you can replace your Base Station's rechargeable batteries with different rechargeable batteries.

Does the base station work if my Wi-Fi stops working?

The Base Station will automatically communicate on the cellular network if your Wi-Fi stops working and will automatically switch to battery power if you lose electricity. If you've been a customer since 2019 or earlier, it may be time to update your cellular module to ensure your home remains protected in the event of a power outage.
