

Energy storage cabinet converted to solar power generation credit

Overview

You may claim the residential clean energy credit for improvements to your main home, whether you own or rent it. Your main home is generally where you live most of the time.

The Residential Clean Energy Credit equals 30% of the costs of new, qualified clean energy property for your home installed anytime.

Qualified expenses include the costs of new clean energy propertyincluding: 1. Solar electric panels 2. Solar water heaters 3. Wind.

Clean energy property must meet the following standards to qualify for the residential clean energy credit. Solar water heatersmust be certified by the Solar Rating Certification.

The Residential Clean Energy Credit allows homeowners to claim a tax credit for 30% of the cost of installing renewable energy systems, including energy storage solutions like battery systems paired with solar panels and solar water heaters. What tax credits are available for solar energy installations?

There are two federal tax credits that incentivize solar installations: (1) the Section 48 Investment Tax Credit (ITC) available to businesses who invest in solar energy systems; and (2) the Section 25D residential credit that may only be claimed by individuals who purchase a solar energy system or a standalone energy storage system for their home.

Are energy storage technologies eligible for 48 credits?

Other modifications to definitions include, but are not limited to, the following: Energy storage technology is eligible for the §48 credit if it satisfies the requirements, notwithstanding that it may be co-located or shared by a facility that is otherwise eligible for §45, 45V, or other 48 credits.
