

# German energy storage exports

### **Overview**

What is energy storage in Germany?

Energy storage systems are an integral part of Germany's Energy Transition (Energiewende). While the need for energy storage is growing across Europe, Germany remains the lead target market and the first choice for companies seeking to enter this developing industry.

Is Germany a key market for energy storage?

While the need for energy storage is growing across Europe, Germany remains the lead target market and the first choice for companies seeking to enter this developing industry. Germany stands out as a unique market, development platform and export hub for energy storage systems.

Does Germany need energy storage systems?

While around 254 terawatt-hours (TWh) of electricity were generated from renewable energy in Germany in 2022, 600 TWh of electricity are expected to come from renewable sources by 2030. Germany is particularly dependent on a market ramp-up of energy storage systems, especially battery storage systems. What role do energy storage systems play?

.

What percentage of Germany's energy storage installations surpassed 5gwh?

Specifically, new installations of residential storage surpassed 5GWh, capturing a substantial 83% share, followed by utility-scale energy storage and commercial & industrial (C&I) storage, which accounted for 15% and 2% respectively. Proportion of Germany's Installations Types.

Does Germany have a wind power plant?

Installed wind energy capacity in Germany has also witnessed significant growth in recent years, growing from 26.9 GW in 2010 to 63.7 GW in 2021. In

October 2022, Fluence Energy and TransnetBW announced plans to develop a 250 MW battery energy storage (BES) as a transmission project in Germany.

Which countries have the most energy storage installations in Europe?

Germany, the United Kingdom, and Italy maintained their positions as the top three markets for energy storage installations in Europe during 2023. As per statistics from TrendForce, Germany, the UK, and Italy added 6.1 GWh, 4.0 GWh, and 3.9 GWh of installations, respectively, during the year.
