

## **Guyana Communication Base Station Energy Storage Project**

## **Overview**

What is the gas-to-energy project in Guyana?

Our operations in Guyana are helping to supply the world's energy needs by producing more than 600,000 barrels of oil a day. The Gas-to-Energy project is expected to greatly improve the quality of life for the people of Guyana.

What is a Bess & how will it impact Guyana?

The arrival of the BESS follows the earlier delivery of two gas turbines, each capable of generating 45 megawatts of electricity. Together, these components are expected to enhance the reliability of Guyana's national grid, reduce carbon emissions, and support the delivery of more affordable electricity.

What's happening in Guyana?

Last month, at the Guyana Energy Conference and Supply Chain Expo, we showcased the success we've had in Guyana to date and discussed the projects we have planned for the future. One of those projects is a 140-mile pipeline that will connect our offshore operations to the mainland.

## **Guyana Communication Base Station Energy Storage Project**

<u>Battery system arrives in Guyana for delayed</u> <u>Gas-to-Energy project</u>

The Gas-to-Energy project, originally scheduled for completion by the end of 2024, has been delayed. Prime Minister Mark Phillips said in May that the facility is now expected to ...

<u>Energy Storage Regulation Strategy for 5G Base Stations ...</u>

The rapid development of 5G has greatly increased the total energy storage capacity of base stations. How to fully utilize the often dormant base station energy storage resources so that ...
