

How long does it take for home solar photovoltaic panels to pay back

Overview

Your solar payback period is the time it takes to break even on your initial solar investment. The average EnergySage solar shopper breaks even in about seven years with the current 30% tax credit. After the federal tax credit expires on December 31, 2025, payback periods will increase by 43%. How long does it take for solar panels to pay back?

So, if it takes 10 years to recover the cost of your solar panels, you can still expect savings on your electric bills for another 15 years, which is an excellent investment. Solar companies can provide you with an estimate of your payback period.

How long is a solar panel payback period?

The solar panel payback period typically ranges from six to 10 years, varying based on system size, location and incentives. Federal and local rebates, including a 30% federal tax credit, significantly lower initial solar installation costs.

How long do solar panels last on EnergySage?

That's the average payback period on EnergySage. At the end of those 7.1 years, your solar panels will have saved you enough money on your electric bill to cover the upfront cost of your system. Year eight in the example is when you technically start saving money, having finally broken even on your investment.

How long does it take to recoup solar energy?

Switching to solar energy is a major financial commitment and, if you're like most homeowners, you'll want to know how long it will take to recoup your investment. This average recovery time, called the solar panel payback period, typically ranges from six to 10 years, depending on a handful of factors.

How do I calculate the payback period of solar panels?

The easiest and most accurate way to calculate the payback period of solar panels is by getting multiple quotes from vetted local installers, which you can do right here on solar.com. But if you want to get a ballpark estimate on your own, here's the formula for calculating your payback period.

How long does it take a solar system to pay off?

The average solar payback period for EnergySage customers is currently just over seven years. However, without the federal tax credit, that same system would take over 10 years to pay for itself. Here's what you need to know about how long it's likely to take you to break even on your solar energy investment—and why timing matters.
