

How much does it cost to install photovoltaic panels on European roofs

Overview

On average, a residential solar PV system in the EU can cost anywhere between €4,000 and €10,000 for a standard 3 to 5 kW system, which is typically enough for an average household. If you have a larger home or higher energy needs, you might need a bigger system, which could cost more. How much does a solar panel installation cost?

A complete solar panel installation typically costs an average of 3 000 to 5 700 euros, including installation costs and excluding VAT. The exact cost of your solar panels depends on factors such as the type of installation and the number of panels, while the number of panels you install depends on your energy consumption.

Is it worth installing solar panels on a slate roof?

This is 30% more expensive than the typical cost of a solar panel installation in the UK, which is £7,026. All the extra cost comes from the added labour and tools it takes installers to carefully remove, reshape, and replace the slate tiles, all without damaging them. However, it's still worth installing solar panels on a slate roof.

How long does it take to put solar panels on a slate roof?

Yes, it usually takes longer to put solar panels on a slate roof. Your installer will typically spend around five days to set up the solar panel system, compared to a standard installation time of one or two days for most roofs. A longer installation raises your costs, as we'll explain in more detail in the next section.
