

How much is the income tax incentive for energy storage projects

Overview

Do energy storage projects qualify for a new ITC?

Energy storage projects placed in service after Dec. 31, 2022, that satisfy a new domestic content requirement will be entitled to a 10% additional ITC (2% for base credit).

Are battery storage systems eligible for a tax credit?

For the first time, standalone storage systems will be eligible for a 30 percent investment tax credit (ITC) — and up to 70 percent with additional incentives. "It's a really big deal," said Peter Cavan, Director of Market Development for battery storage developer Convergent Energy and Power.

What is the ITC rate for energy storage projects?

Energy storage installations that begin construction after Dec. 31, 2024, will be entitled to credits under the technology-neutral ITC under new Section 48E (discussed below). The base ITC rate for energy storage projects is 6% and the bonus rate is 30%.

Is energy storage eligible for the IRA ITC?

Standalone energy storage is not eligible for this credit, but energy storage installed in connection with wind and solar projects may be eligible. In addition to all the changes for the ITC, the IRA also revised the Section 25D credit homeowners use for residential energy storage projects, such as batteries.

Does the IRA cover energy storage projects?

According to Cavan the tax credit will now cover interconnection, microgrid controllers and a broader scope of components often used in clean energy systems. To maximize tax credits under the IRA, energy storage projects must meet two labor requirements.

Who can claim energy storage credits?

Taxpayers with a qualified facility and energy storage technology placed in service after Dec. 31, 2024 may claim the credit. Elective payment and transfer of credits may be available to certain applicable entities to include taxexempt organizations and government entities.
