

How much power can a portable outdoor power bank provide

Overview

I've tested multiple portable power banks in remote locations, and the top performers include the Jackery Explorer 1000 v2 with 1070Wh capacity for high-demand devices, the GRECELL 300W station offering 230.88Wh with efficient MPPT solar charging, and the compact P201 providing 148Wh with multiple connectivity options. What size power Bank do I Need?

This will dictate what size power bank you need in terms of battery capacity, which is usually measured in milliamp hours (mAh). To help you out, note that it typically takes 2,500 to 3,500mAh to charge a modern smartphone (though many factors can affect power consumption).

What is the best power bank for camping?

Offline maps. Getting down to less than 10 percent on a camping trip can be a little stressful. The Charge 40 PD was one of the best power banks for camping in the 10,000mAh range during testing, and it has a budget friendly price. The BioLite Charge 20 PD is exactly what you need at the right price.

Do you need a power bank for camping?

It only takes one dead phone battery to make you realize the importance of a power bank for camping. Whether it's snapping a picture of the local flora and fauna, setting an alarm for your sunrise hike, or pulling up directions for the drive home, it's essential that you have enough juice to last to the end of your trip.

Do you need a waterproof power bank?

In damp, humid conditions or on expeditions you might need a waterproof and rugged power bank, which can cope with moisture or even complete immersion as well as bumps and knocks. If so, look for a product with a certified IP (International Protection) rating, which is usually expressed as two letters or numerals, e.g. IPX6 or IP67.

Should you buy a battery charger or a power bank?

Put simply, the larger the rated capacity (in mAh), the more juice the power bank can store – though the trade-off is increased size and weight. So if you're only carrying a smartphone on a day walk and just want a back-up power source, look for a pocket-sized battery charger.

How many times can a power bank charge an iPhone 14?

By comparing the storage capacity in your device to that of the power bank or station, you can get an idea of how many recharges you have available. A power bank with 10,000 mAh would ideally be able to charge an iPhone 14 (with 3,279mAh battery) at least two times. All the products in our lineup are made with lithium ion batteries.
