

Indian power generation equipment container

Overview

What are mobile & containerized substations?

Versatile Mobile & Containerized Substations for Rapid Deployment. E-Houses: Compact, Modular, and Efficient Power Solutions for Any Terrain. Mobile Substations are fully integrated, transportable power solutions mounted on trailers or skids, designed for temporary or emergency power supply.

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

What is a containerized generator enclosure?

Our containerized generator enclosures are built to be highly mobile, allowing you to easily transport and relocate your generator equipment as needed. The modular design enables quick assembly and disassembly, making it an excellent choice for temporary power needs or projects requiring frequent relocation.

What is the standard ventilation for genset containers?

The standard ventilation is designed for ambient temperatures from -25°C to +40°C. The genset containers can be equipped with several additional features to enable operation at lower temperatures on request. Type 6 containers are available with a similarly broad range of options that we offer for the Type 2 / 3 / 4 containers.

What types of containers are available?

Type 6 containers are available with a similarly broad range of options that we offer for the Type 2 / 3 / 4 containers. These include several heat recovery

configurations, exhaust after treatment systems, compliance with countryspecific regulations, earthquake safety requirements and various ambient conditions.
