

# Lithium battery pack placed flat on its side

#### **Overview**

Yes, you can mount your lithium battery on its side, provided it is properly secured. Unlike traditional flooded batteries, lithium batteries are designed to be versatile in installation orientation. Can You mount a lithium battery on a side?

Yes, you can mount your lithium battery on its side, provided it is properly secured. Unlike traditional flooded batteries, lithium batteries are designed to be versatile in installation orientation. However, always consult the manufacturer's guidelines to ensure that side mounting does not affect performance or safety.

Where should a lithium battery be placed?

This gives you the flexibility to install the battery where it is best suited for your application. Here are further details regarding Battery Orientation from our User Manual: Lithium batteries can be placed upright or on their sides. Do not install batteries in a zero-clearance compartment, overheating may result.

Is side mounting a lithium battery safe?

While side mounting is generally safe for lithium batteries, there are some considerations to keep in mind: Secure Installation: Ensure the battery is firmly secured to prevent movement during operation. Ventilation: Although lithium batteries do not emit gases like flooded batteries, providing some ventilation can still be beneficial.

Can LiFePO4 batteries be placed upright?

Yes, because there is no fluid inside of LiFePO4 batteries. This gives you the flexibility to install the battery where it is best suited for your application. Here are further details regarding Battery Orientation from our User Manual: Lithium batteries can be placed upright or on their sides.

Should a battery cell be placed on a flat side?

Put the cell on the flat side, only the lower layers in the stack can potentially contact the electrolyte. The electrolyte is pretty expensive, and the manufacturer doesn't want to use any more than necessary to make the battery cell functional. Otherwise, perhaps there would be more.

Should a battery be placed on a long or short side?

Many can be placed on EITHER the long side or the short side - NEVER BOTH. Placing a cell/battery on its side depends on the manufacturer's cell construction AND the battery builder's orientation of cells within the pack. ALL cells are designed/constructed to work optimally with the vents and terminals up.
