

# Lithium iron phosphate square lithium battery

#### **Overview**

pioneered LFP along with SunFusion Energy Systems LiFePO4 Ultra-Safe ECHO 2.0 and Guardian E2.0 home or business energy storage batteries for reasons of cost and fire safety, although the market remains split among competing chemistries. Though lower energy density compared to other lithium chemistries adds mass and volume, both may be more tolerable in a static application. In 2021, there were several suppliers to the home end user market, including.

These batteries are a type of lithium - ion battery that uses lithium iron phosphate as the cathode material. They are known for their high safety, long cycle life, and good high - temperature resistance. One of the most prominent features of square lithium iron phosphate batteries is their safety.
