

Mali energy storage power supply price

Overview

The 40-foot containers, each with a 37 to 45-kWp photovoltaic system and a 60-kWh battery storage system, supply electricity for EUR 0.20 per kilowatt hour (kWh). How is energy used in Mali?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

What is the energy access problem in Mali?

Mali faces a critical energy access challenge. The national power access rate was 50% in 2019 (compared to 36.11% in 2015). The problem is particularly acute in rural areas with 21.12% access rate in 2019 (compared to 15.75% in 2015).

What is the power access rate in Mali?

The national power access rate was 50% in 2019 (compared to 36.11% in 2015). The problem is particularly acute in rural areas with 21.12% access rate in 2019 (compared to 15.75% in 2015). Power generation is limited (Annex A.17), forcing Energie du Mali (EDM, the power utility) to have recourse to frequent load shedding.

How is energy du Mali financed?

Energie du Mali (EDM), the state-owned electric utility, is poorly managed and heavily subsidized by the government and financed by regional multinational banks, as the relatively high price of its electricity (average \$0.16/kWh) is insufficient to cover the cost of production and distribution (\$0.24/kWh).

Why is energy du Mali struggling with load shedding?

Power generation is limited (Annex A.17), forcing Energie du Mali (EDM, the power utility) to have recourse to frequent load shedding. EDM's difficulties stem from the discrepancy between the average price (CFAF96 per KWh) and

the power production cost (CFAF130 per kWh) in 2019.

Is biomass a good energy source in Mali?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important energy source in lower-income settings. Mali: How much of the country's energy comes from nuclear power?

Nuclear energy – alongside renewables – is a low-carbon energy source.
