

Mongolian energy storage project foreign trade

Overview

Will Mongolia have a battery energy storage system?

A planned battery energy storage system for Mongolia will be the largest of its type in the world and provide a blueprint for other developing countries to follow as they decarbonize their power systems. Mongolia's coal-dependent energy sector accounts for about two thirds of Mongolia's greenhouse gas emissions.

What is the proposed project in Mongolia?

The proposed project is included in the Country Operations Business Plan for Mongolia (2020-2021). The outcome targets of the proposed project are (i) 610 GWh of annual renewable power evacuated; (ii) 44 GWh of annual imported peak time electricity reduced; and (iii) at least 650,000 tons of CO2 emissions avoided per year.

What is Mongolia's New recovery policy?

Furthermore, as per the New Recovery Policy, Mongolia aims to develop renewable energy in an appropriate ratio, build hydropower and storage stations, and ensure the reliability and stability of the integrated energy system.
