

# Nordic energy storage power supplier

#### **Overview**

On 5 September 2025, BOS Power signed a supply agreement with HiTHIUM, a leading global company in energy storage technology, for the delivery of 3 GWh of battery energy storage systems (BESS) to projects across Denmark, Sweden, Finland, and Norway through 2027. What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

Is Energi the most forward-looking Renewables Group in the Nordic region?

This acquisition reinforces Å Energi's ambition to be the most forward-looking renewables group in the Nordic region. Å Energi is Norway's biggest renewable energy group, with operations throughout the value chain from electricity generation to end users.

Are Nordic batteries looking for a development engineer?

Nordic Batteries are seeking a development engineer for mechanical construction and system design. Factor 47 is operative! The pilot line where Nordic Batteries will produce their first battery modules is now officially open after the visit from former Prime Minister Erna Solberg where she cut the banner to kick it off.

What is the energy storage industry in Sweden?

To sum up, the energy storage industry in Sweden is in a phase of rapid development, and these energy storage companies have taken a significant position in the market through continuous innovation and optimization of solutions. For more information about energy storage companies, visit their official websites.

Is Northvolt a good energy storage company?

Northvolt, as one of the top 10 energy storage companies in Sweden, founded in 2015 by former Tesla executives, is a Swedish battery manufacturer specializing in lithium-ion technology for electric vehicles and energy storage.

Should Energi expand its energy storage portfolio in Finland?

"Finland is a promising market for energy storage projects, being well set up for ancillary services and with growth forecast in the wholesale electricity market. This makes the country ideal for Å Energi to expand its energy storage portfolio", says Atle Knudsen.
