

# Outdoor Energy Storage Power Supply Development

#### **Overview**

How will a pumped storage power plant contribute to the energy transition?

The company is making a significant contribution to the energy transition and is continuing its corporate transformation towards more renewable energy generation. By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany.

Why should we invest in a pumped storage power plant?

By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany. This investment is part of our previously announced strategy to invest in growth and transformation towards a greener business.

Why is Happurg pumped-storage important?

With the Happurg pumped-storage plant, we want to make more storage capacity available again. As Germany's largest hydropower operator, we are thus contributing to a reliable power supply in the south and demonstrating our commitment to the energy transition.

What is pumped storage & why is it important?

Pumped storage is by far the most proven large-scale energy storage technology. They are emission-free, inherently sustainable and make an important contribution to grid stability and security of supply – enabling the integration of fluctuating solar and wind power and thus paving the way for the energy transition.

Why is Germany's largest hydropower operator a reliable power supply?

As Germany's largest hydropower operator, we are thus contributing to a reliable power supply in the south and demonstrating our commitment to the energy transition. The 160-megawatt (MW) power plant has a drop height of 209 meters and can store approximately 850 megawatt-hours (MWh) of

electricity in the form of pumped water.

Why should you choose Landshut power stations?

Our plants and power stations provide a wide range of additional benefits, from flood protection to grid stability and water purification. A central control room at the company's German hydropower headquarters in Landshut ensures that the power stations work together to meet demand.

## <u>Powering the Future: Trends and Insights into the Outdoor Energy</u>

From disaster recovery zones and camping sites to EV charging stations and rural electrification projects, the need for durable, scalable, and mobile energy storage has never ...

#### Outdoor Energy Storage Power Supply Design: Balancing ...

If you've ever tried to charge a phone while camping only to find your power bank deader than the campfire embers, this article's for you. We're diving into outdoor energy storage power supply ...

### <u>Product types of outdoor portable energy storage</u> <u>power supply</u>

Outdoor power supply is a multi-functional power supply with built-in lithium ion battery and can store electric energy, also known as portable energy storage power supply. The outdoor power

### Outdoor power stations supply has reached a new development ...

The reporter learned that Outdoor power stations supply, as a rapidly developing product category in recent years, is a small energy storage device

that can replace traditional small fuel ...

<u>Uniper recommissions Happurg pumped-storage</u> plant for around ...

With the Happurg pumped-storage plant, we want to make more storage capacity available again. As Germany's largest hydropower operator, we are thus contributing to a reliable power supply ...
