

PV module price per watt in 2025

Overview

In 2025, solar cell prices for residential users range from \$2.80 to \$3.80 per watt, but this can vary by the location and size of the system, as well as the complexity of the installation. Thus, a 6 kW solar cell system can cost between \$16,800 and \$22,800 even before incentives from the government.
