

Phase change energy storage prices in Belgium

Overview

What will Belgium do to improve energy prices?

Price monitoring will be intensified, and the CREG will expand its analysis of energy prices in export markets to ensure competitiveness. The government also announced continued efforts to make energy invoices more transparent. Hydrogen: Belgium aims to position itself as a hub for hydrogen and its derivatives.

What is the future energy policy in Belgium?

The policy aims to balance three main objectives: reducing energy consumption, expanding reliable energy capacity and enhancing the competitiveness of the Belgian industry, which faces high energy prices. Key elements of the future energy policy include:.

Why do we need a massive investment in Belgian industries?

Massive investment is needed in Belgian industries but investors might decide they can't justify the costs in a country where energy prices are so high. It will be our industrial base that suffers first but we know what follows: unemployment, a growth in public debt, budget cuts, social instability et.c.

How renewables are affecting Belgium's power supply?

Renewables—especially wind and solar—are rapidly increasing their share of Belgium's power supply. In 2023, wind and solar accounted for roughly one-third of the electricity mix, a significant jump from the previous decade. Offshore wind in the North Sea is a particular success story, with Belgium now among Europe's leaders in offshore capacity.

How will nuclear energy affect Belgium's future energy policy?

Contrary to previous policies, nuclear energy will play a crucial role in Belgium's future energy policy. The government has announced a program to revive Belgium's nuclear industry and repeal all provisions related to the

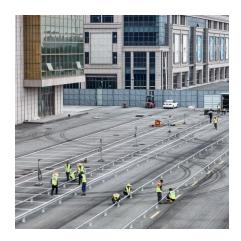

nuclear phase-out and the ban on new capacity construction.

Why are energy imports booming in Belgium?

Imports from France, the Netherlands, the UK, and Germany have surged recently. This cross-border trade is integral to meeting Belgium's electricity demand and managing price volatility. Expect import dependence to continue as the renewable buildout ramps up and nuclear availability changes. 2. Renewables on the Rise
