

Photovoltaic power generation with energy storage in Guinea-Bissau

Overview

Near the capital Bissau, a 30 MWp solar power plant will be built with the aim of "reducing the average cost of electricity in the country and diversifying the energy mix, while battery storage will make it possible, in the first phase, to smooth the injection curve and, in the second phase, to provide services to the electricity system", according to the Bissau-Guinean Ministry of the Economy, Planning and Regional Integration.

Photovoltaic power generation with energy storage in Guinea-Bissa

<u>Guinea-Bissau energy storage participates in power field</u>

How will solar power work in Bissau & Gabu? In Bissau, solar photovoltaic (PV) plants will help reduce the average cost of electricity in the country and diversify the energy mix, while battery ...

<u>Guinea-Bissau launches large-scale solar projects</u> <u>with IDA support</u>

A 30 MWp solar power plant will be built near Bissau to reduce the average cost of electricity and diversify the energy mix. According to Guinea-Bissau's Ministry of the Economy, Planning and ...
