

Romania Charging Market Station Energy Storage Project

Overview

Is Romania funding a battery energy storage system?

The Romanian Ministry of Energy has announced a new round of funding from the Modernization Fund dedicated to battery energy storage systems. From ESS News Romania has launched a new non-refundable funding program for battery energy storage systems to the tune of €150 million (\$158 million), this time dedicated to standalone facilities.

How much does Romania spend on energy storage?

Specifically, Romania allocated EUR 80 million (USD 87m) under its National Recovery and Resilience Plan for an energy storage programme expected to award 1.8 GW of capacity. Submitted projects as part of the scheme are being assessed and contracts are due to be signed in September.

How will Romania cope with high energy prices?

(EUR 1.0 = USD 1.088) Romania aims to have at least 2.5 GW of battery energy storage systems (BESS) in operation by next year and to surpass 5 GW of capacity by 2026 under a plan that is seen to help it cope with high energy prices.
