

Solar all-in-one machine introduced to indoor home use

Overview

How does a solar energy system work?

From sunrise, the system captures solar energy and delivers it directly to your home through its grid-tied output. Surplus energy is automatically stored for use during peak hours, at night, or in the event of a short-term outage.

What's new with a new solar inverter?

The new residential offering will integrate a scalable battery and a new solar inverter up to 11.5kW to provide highly flexible whole home backup to fit various types of home across the US. This press release features multimedia.

How many inverters can a solar inverter run?

It can scale up to four battery modules per single battery (up to 17.6kWh), up to four batteries per inverter (up to 70.4kWh) and up to three inverters per site (211.2kWh). From an installer perspective, this enables the selection of the appropriate system size per individual and future system owner needs.
