

# **South African Vanadium Flow Battery Company**

## Overview

---

What is vanadium flow battery technology?

Vanadium Flow Batteries use vanadium flow battery technology, a rechargeable flow battery technology that stores energy using the ability of vanadium to exist in solution in four different oxidation states. This property of vanadium allows it to produce batteries with.

Where will Australia's first utility-scale vanadium flow battery be installed?

Download this media release (PDF 90KB) Australia's first ever utility-scale vanadium flow battery is set to be installed in Neuroodla, regional South Australia.

Why is Vanadium so popular in South Africa?

The relative ease of vanadium electrolyte production and the availability of vanadium in South Africa further enhances the attractiveness of this specific flow technology." Vanadium forms one of SA's largest mineral resources. and localisation." you attention.

## South African Vanadium Flow Battery Company
