Overview

What is the outlook for Syria's Energy Resources & Infrastructure?

A quick outlook regarding Syria's energy resources and infrastructure, including the role of declining oil revenue under the Assad regime's governance and the prospects for, and geopolitical impact of, Syrian energy production and trade in a new era.

Is Syria's energy system in ruins?

Syria's energy system is in ruins. To rebuild energy security the country's new government faces two major challenges. The first, vital for Syria's swift recovery and political stability, is bringing reliable flows of electricity and fuel to its people.

Can Syria match all-purpose energy demand with wind-water-solar (WWS)?

This infographic summarizes results from simulations that demonstrate the ability of Syria to match all-purpose energy demand with wind-water-solar (WWS) electricity and heat supply, storage, and demand response continuously every 30 seconds for three years (2050-2052).

Should Syria become an energy hub?

In the longer term, it should offer Syria a role in an interconnected Eastern Mediterranean energy hub with independent access to the EU market for gas and electricity. For more than a decade, Syrians have been coping with severe energy shortages. Years of war and division have crippled over 50% of the country's electricity grid.

What if Syria doesn't have reliable energy supplies?

The lack of reliable energy supplies is a major concern for Syrian citizens and its new government, making it a key point of leverage. Qatar and Türkiye have stepped in to provide short-term assistance. The two states have provided two floating power stations, while Türkiye is also connecting its grid to Syria.

Can the EU help Syria regain energy security?

Syria has many challenges. Energy is one. The EU can be part of the solution with a strong offer supporting domestic electricity generation and long-term energy system integration. Syria's energy system is in ruins. To rebuild energy security the country's new government faces two major challenges.
