

Ukrainian photovoltaic energy storage power station

Overview

A complex of energy storage systems capable of powering 600,000 homes for two hours has begun operation in Kyiv and Dnipropetrovsk Oblasts, Energy Ministry reported on Sept. 11. How repower Ukraine keeps power supply in Ukraine?

Renewable energy generation has been maintaining power supply in Ukraine through the ongoing Russian invasion. With the effects of the Russia-Ukraine war on the global energy market well documented, RePower Ukraine has been working to maintain power supply on the ground by installing solar PV and battery storage.

Can solar power plants help Ukrainian society?

"Solar power plants can help Ukrainian society," Sokolovskyi says, by giving energy independence to private citizens and businesses. Moreover, support for critical infrastructure like hospitals, clinics and schools – the kind of work Semenyshyn's Repower Ukraine does – often comes from PV and energy storage combined.

How does the war in Ukraine affect PV & storage?

The ongoing war in Ukraine has been a catalyst for PV and storage deployment. Image: Oleg Ivanov via Unsplash. When the shelling gets worse, sales of renewable energy systems increase; when it eases, demand subsides until the shelling starts again. "It's pretty funny," says Artem Semenyshyn, board member at RePower Ukraine Charitable Foundation.

Is Ukraine ready for a decentralised energy system?

Acknowledging that renewable energy will play a crucial role in ensuring energy security and sustainability for the nation, RePower anticipates a shift in Ukraine towards decentralised (and thus more resilient) energy systems. The nation has strong potential for wind and solar generation.

Why are Ukrainian businesses turning to self-consumption solar PV systems?

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.
