

Vatican communication base station wind power problem

Overview

Does Vatican Radio have solar panels?

Pope Francis has decreed that an area of northern Rome long used by Vatican Radio will now house a field of solar panels to fuel Vatican City FILE - A view of the antennas of the Vatican Radio, which beams the Pope's words around the world, is seen in Santa Maria di Galeria, on the outskirts of Rome, on April 11, 2001.

Will a Vatican Radio station be installed in 2025?

The future installation would be projected to "ensure, not only the power supply of the radio station existing there, but also the complete energy support of Vatican City State," he wrote. Fast forward to 2025, and the project is completed.

Why did the Vatican stop broadcasting?

In 2012, the Vatican announced it was cutting in half the hours of transmission from the site, not because of health concerns but because of cost-saving technological advances in internet broadcasting.

Did the Vatican have a link between electromagnetic waves and leukemia?

As the once-rural area some 35 kilometers (20 miles) north of the Vatican became more developed, residents began complaining of health problems, including instances of childhood leukemia which they blamed on the electromagnetic waves generated by the towers. The Vatican long insisted there was no causal link.

Will the Vatican replace its car fleet with electric vehicles?

Under Pope Francis, who wrote an entire encyclical on the need to care for God's creation, the Vatican has begun replacing its car fleet with electric vehicles as part of an overarching plan, "Ecological Conversion 2030," which aims to pursue sustainable, carbon-neutral projects and technologies in the

44-hectare (109-acre) city state.
