

Vietnam installs solar power generation for home use

Overview

Viet Nam's ability to rapidly scale up solar generation over the last decade is down to a combination of factors, including supportive government intervention, a positive policy environment and international collaboration.

Globally, solar generation continues to go from strength to strength. In 2021, after an additional 143 TWh of solar capacity added to the world's energy mix.

Viet Nam's ascendancy into the top ten global solar generators must be placed in the wider regional context of Asia. A rapid transition towards renewable energy is.
