

Western European energy storage battery export channels

Overview

What is the battery storage Europe platform?

"The Battery Storage Europe Platform represents a vital opportunity to help shape smarter regulation and advocate for a policy framework that truly supports investment in storage. If we are to scale at the pace the energy transition demands, platforms like this must lead the way." Managing Director, Renewable Energy Insurance Broker (REIB).

Does Europe need a battery supply chain?

With rising demand for electric vehicles (EVs) and renewable energy storage, Europe has made efforts to build its own supply chain for battery production, but the continent has long been dependent on global suppliers – particularly those in Asia – for key battery components.

How can Europe create a robust battery supply chain?

By revisiting subsidy and incentive programmes that support scaling of the entire value chain, and by leveraging technology/skills transfer and industrial partnerships with leading nations, Europe can refine its strategies to create a robust battery supply chain, according to Fastmarkets' head of battery raw materials analytics, Paul Lusty.

Will Europe's Lithium-ion battery chain need government support?

"One way or another, Europe's lithium-ion battery chain will need significant government support or partnerships with those who already have the know-how and those who can bring in the finance," Adams added.

What are the key market trends for battery storage?

It covers key market trends, with a particular focus on the shift toward utility-scale storage, the continuing growth of residential and commercial installations, and the evolving role of battery storage in supporting Europe's clean energy goals.

What is battery energy storage?

Battery energy storage offers an affordable and practical solution to balance energy demand in a grid increasingly powered by renewables. As variable sources like solar and wind expand, so does the need for storage to support a flexible, integrated energy system.
