Overview

Why should you choose a battery based energy storage system?

By sourcing batteries separately, users can expand their energy storage capacity as needed without overhauling the entire system. This scalability makes it an ideal solution for both residential and light commercial applications, future-proofing investment and enabling smart energy management.

What is a liquid cooled battery energy storage system?

The system consists of: Ready to install liquid-cooled battery energy storage system with one (2-hour version) or two (4-hour version) battery cabinets, and a PCS cabinet. Liquid cooling provides two years longer battery service life and 15% higher discharge capacity, while maintaining less than 2.5 degree C delta between cells.

Can a battery be installed with a new home energy system?

Installers can seamlessly integrate the battery with a new or existing home energy system, both DC and AC suited, for a smooth installment. The EVERVOLT is equipped with an integrated transmitter to ensure an easy installation of rapid shut down devices for safe PV array connections.

How many savant power storage 20 batteries can be installed?

Each Savant Power Storage 20 Battery can support up to two Savant Power Inverters, allowing for an increased solar capacity. The cabinet and modular battery tray design make installation faster and simpler. Up to eight Power Storage 20s can be installed for 160 kWh of combined storage.

How many energy storage units can be connected together?

Stackable and lightweight, installers can effortlessly connect up to four units together for additional energy storage. Available in three sizes including 9 kWh, 13.5 kWh, and 18 kWh to meet an installation company's growing

customer energy demands. Operating modes: back-up mode, self-use mode, time-of-use mode and custom modes.

Can a Bess system be sold as a separate battery and PCs unit?

The system is designed, engineered, and sold as a packaged design. It is not intended for sale as separate battery and PCS units. The system controller, auxiliary power supply, and communications require both BESS and PCS to work as one.
