

# Which sodium-sulfur battery energy storage container is best in Lebanon

#### **Overview**

What is a standard NaS battery container?

A standard single NAS battery container has 1.45 MWh energy capacity. The containers are stackable, enabling utility scale energy storage systems. We supply containerized NAS battery systems: one standard 20-ft container has 1.45 MWh energy capacity. The compact form enables easy transportation and quick installation at our customers' sites.

What is a sodium sulphur battery?

A sodium sulphur battery is a high-temperature battery. It operates at 300°C and uses a solid electrolyte. One electrode is molten sodium and the other is molten sulphur, and it is the reaction between these two that is the basis for the cell reaction. NAS batteries are long-life, high-energy stationary storage batteries.

Why is energy storage important?

Energy storage is an important and versatile tool to help manage onsite power quality and reliability, reduce energy costs and enable the greater adoption of locally produced renewable energy.
